

— 01 — VIETNAM, 2024

687 **MILLION**

chickens were slaughtered in
Vietnam in 2024 — **about 22 every
second.**

— 02 — A SIX-WEEK LIFE

42 DAYS

is all most meat chickens get. Killed at six weeks old — **though a chicken can live up to 10 years.**

— 03 — BUILT TO GROW

400% FASTER

The breeds raised on industrial farms grow **4 times faster** than those of 1957 — bred for weight their hearts and legs can't keep up with.

+77%

And it keeps climbing — from **389 million** birds a year in 2015 to **687 million** in 2024. Nothing about their lives has changed.
